MEDIA

WELCOME to the **Environmental Protection Virtual Event 2010**. The first online conference for **Environmental Protection**, this event combines outstanding networking opportunities with expert presentations on important environmental issues, including toxic chemical and greenhouse gas regulations.

Our sponsors stand ready to share information about new products, offer white papers and other free resources, and answer your questions via one-on-one contact with their booth representatives. Attendees can make new contacts, gain insights, and find solutions to help them do their jobs more effectively.

You'll want to attend the keynote presentation on greenhouse gas regulation by David Downard, P.E., Senior Project Manager, Providence Engineering and Environmental Group LLC. You can check the Auditorium to find out when the live presentations begin. Be sure to explore the rest of our content-rich, interactive virtual environment by visiting the Exhibit Hall, Auditorium, Lounge, Media Center, and Prize Center. Come visit the **Environmental Protection** and **Occupational Health & Safety** booths in the Exhibit Hall if you need any assistance getting around.

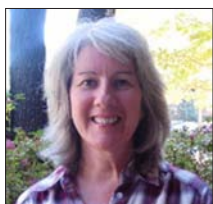

We want you to find exactly what you need, leaving with tools and ideas you can put to use immediately to enhance your environmental protection needs.

Thank you for your continued support, and enjoy Virtual Event 2010.

Lisa K. Williams, Editor

P.S. The webinar presentations will be accessible on demand through February 10, 2011.

Navigating Through Our Virtual Event

The **Environmental Protection Virtual Event 2010** offers several dynamic must-explore venues. Be sure to visit each one to experience the full effect of the event. Here's what you'll find in each area:

- **Auditorium** - Listen to the keynote and sessions, or participate in the live Q&As.
- **Networking Lounge** - Drop by to meet old friends, establish new contacts, or continue conversations that began elsewhere.
- **Exhibit Hall** - Research vendors, collect product information, view product demos, and have in-depth conversations with solutions providers.
- **Media Center** - Collect exhibitor product materials, session proceedings, and other takeaways, and add them to your briefcase.
- **Prize Center** - You may win a show prize!

Show Prize Drawing

Win an Amazon Kindle from **Environmental Protection**! Collect at least 5 points when you perform different tasks, and you will be eligible for the show prize drawing. The winner will be selected at random from all entries after the event and notified via e-mail in the near future. Visit the Prize Center for the rules.

Just saying
they're "green"
isn't enough.

Energy Efficiency Testing from CSA International is the Answer.

CSA International has the energy efficiency testing and verification services you need to stand apart from the competition and prove your claims are real.

We provide third party verification that your products comply with a broad range of local, national and international energy performance standards and requirements. CSA International is also a leading source for testing required under **ENERGY STAR®** and other programs administered by the **U.S. EPA and DOE**, Natural Resources Canada, the California Energy Commission, and more.

Deliver real proof of product energy efficiency with a testing and verification program from CSA International. Email or call us today to discuss a proposal tailored to your needs: cert.sales@csa-international.org

Senior Project Manager,
Providence Engineering and Environmental Group LLC

2:00 - 5:00 p.m. CDT

Visit the Exhibit Hall or view any webinars you missed on demand!

KEYNOTE PRESENTATION

1:00 - 2:00 p.m. CDT

Green House Gas Regulations Are Here—Now What?

presented by David Downard, P.E.

Senior Project Manager, Providence Engineering and Environmental Group LLC

Live Webinar in the Auditorium followed by Q&A

David has a 30-year engineering and environmental background. Fluent in English and Spanish, he has worked with clients throughout Latin America and North America on projects including environmental due diligence, environmental auditing, environmental impact study assessments, regulatory reviews, and litigation support. He has prepared and submitted air quality permit and Title V permit applications for chemical, petrochemical, refinery, natural gas, heavy industry, boilers, and hazardous waste units throughout Texas, New Mexico, Colorado, and Louisiana. He serves as first vice-chair of the North Texas Chapter of the Air & Waste Management Association.

His presentation will discuss the impact of EPA's green house gas regulations on industries required to report emissions and obtain permits.

CONFERENCE SESSIONS

Using Software to Manage Your Integrated Management Systems - 9:00 - 10:00 a.m. CDT

Live Chat sponsored by BSI in the BSI Booth

presented by Raj Sivansankar

Stop by the BSI Booth to chat with Raj Sivansankar about BSI software during this special live chat session.

Urgent CAIR: EPA's New Clean Air Transport Rule - 10:00 a.m. CDT

On-demand Webinar hosted by the Air & Waste Management Association in the Auditorium

presented by

- Sam Napolitano, Director of the Clean Air Markets Division for EPA's Office of Air and Radiation

- Richard Wayland, Director of EPA's Air Quality Assessment Division

Once managed under the 2005 Clean Air Interstate Rule (CAIR), the EPA was ordered by the courts in 2008 to find a better regulatory solution. The new Clean Air Transport Rule (CATR), proposed in July, is EPA's answer. CATR will directly impact 31 states and the District of Columbia, requiring new reductions in power plant emissions that emit ozone precursors and fine particulate. Make sure you know what you need to know by attending this informational and instructional webinar. Valued at up to \$240, this presentation is included FREE during today's event!

TSCA Reform & EPA's Enhanced Chemical Management Program - 11:30 a.m. - 12:30 p.m. CDT

Live Webinar in the Auditorium followed by Q&A

presented by Brian Symmes, Deputy Director of the National Program Chemical Division, Office of Chemical Safety and Pollution Prevention, U.S. Environmental Protection Agency

Brian Symmes is a key member of the management team in the Office of Chemical Safety and Pollution Prevention and is currently helping coordinate internal efforts related to TSCA reform within this office. As the Deputy Director of the National Program Chemicals Division, he helps oversee risk management of legacy toxic substances such as asbestos, PCBs, and lead. Prior to that, he served as a special assistant covering TSCA-related matters for two Administrators and the Assistant Administrator for the Office of Prevention, Pesticides and Toxic Substances (now the Office of Chemical Safety and Pollution Prevention). He has also worked in Congress and at the President's Council on Environmental Quality. Brian has over 20 years of experience in environmental management and regulation, and a substantial background in TSCA.

GOLD SPONSOR

AIR & WASTE MANAGEMENT
ASSOCIATION
SINCE 1907

The **Air & Waste Management Association** is a nonprofit, nonpartisan professional organization that serves as a balanced forum for the safe exploration of ideas related to environmental issues. It provides professional development, informational, and networking opportunities to thousands of environmental professionals in over 65 countries. For more information, visit www.awma.org.

SILVER SPONSORS

Dakota Software Corporation has been providing EHS management software to regulated industries,

consultants and government since 1988. Dakota's primary differentiator is the integration of regulatory content with the software tools. Dakota's ProActivity Suite of software ensures that enterprises are identifying all applicable requirements, communicating substantive regulatory changes that directly affect site operations and providing executive dashboard visibility into EHS compliance and carbon management activities across the enterprise. Dakota's Suite of products, Profiler, Auditor, Tracer, and Scout can be used in combination or independently to proactively manage compliance at the point of control. For more information about Dakota Software, visit www.DakotaSoft.com or call 216-765-7100 ext. 2.

Visit our sponsors in their booths during the event!

A longtime leader in the automatic oil skimming field, **Oil Skimmers, Inc.** has been providing simple,

effective and cost-saving solutions to business and industry for over 40 years. We specialize in recovering all types of floating waste oils, greases and fats from the surface of water and other liquids. When it comes to separating oil from water for recovery and recycling, companies from around the world have utilized our floating tube oil skimmers.

Our focus is on the production of reliable equipment that provides years of trouble-free operation, and on friendly, customer-oriented service. Headquartered in Cleveland, Ohio, we have 38 sales / services offices in the United States and 48 dealers overseas.

MEDIA SPONSORS

Environmental Protection is the comprehensive online information resource for environmental

professionals seeking solutions for air quality, water treatment, hazmat and waste management, research, remediation, and training.
