

Mobility Solutions

Overview

MetTel Federal is a proven, strategic partner to the Federal Government with a long history of tailoring telecom solutions to meet unique agency needs, helping them to achieve cost savings, reduce inefficiencies and improve performance.

Your agency will be able to utilize the latest technologies through optimization, data analytics and award-winning, dedicated support. MetTel is a proud recipient of the GSA Enterprise Infrastructure Solutions (EIS) 15-year telecommunications contract.

Key Benefits

Enhanced Analytics & Reporting

Our tools provide insight into spending patterns, variances and forecasts by location, region, state or systemwide.

Procurement, Kitting & Deployment

We source and configure all of your devices along with each accessories to protect your investment. We provide corporate approved app deployment with the fastest network activation possible.

Rules-based Geo-Fencing

Our technologies automate your field workforce with instant access to the latest and greatest data.

Cross-Carrier Pooling

Only MetTel grants you instant savings and improved efficiency with complete voice, text and data pooling across the nation's leading Tier 1 mobile carriers. Get 99.5% coverage with MetTel.

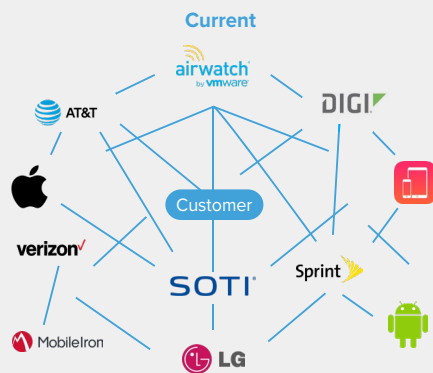

Security & Compliance

MetTel gives you total control over all devices and data, and we help you achieve PCI DCI 3.0. And, all our telehealth devices are HIPAA compliant.

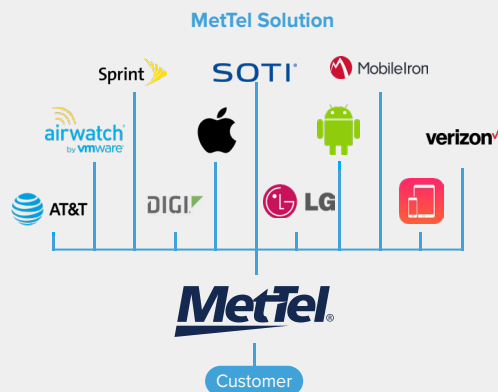

Award-Winning Customer Support

You'll have total access to our 24/7/365 mobile customer care.
