

Governance & Compliance in 2017: A Real World View

AllIM's latest Industry Watch study explores how organizations are addressing their governance and compliance challenges – including increased regulation and heightened risk of data loss.

Key findings include:

48% of orgs rate their information governance (IG) policies as poor or worse.

10%

of orgs report data loss in the past 12 months due to staff negligence or bad practices.

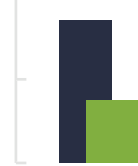

3

Biggest IG Challenges:

Getting anyone interested (38%), **Getting endorsement** from senior management (35%), Having **the right people** involved (31%).

34%

of respondents say their companies **do not offer** them IG training at all.

15%

say IG training is **provided only** at induction to the workforce.

Orgs use automated tools to:

Detect Security Risks

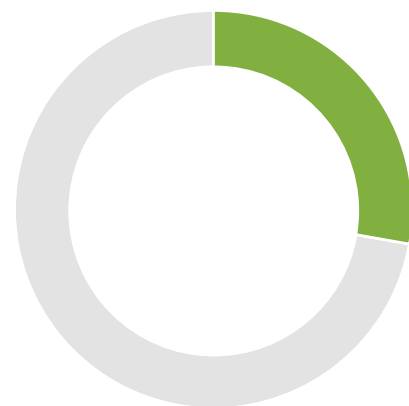

30%

Detect Duplicate Files

27%

Detect Unusual Activity

27%

28% of orgs report manual search across file shares, email and physical records as their primary ediscovery mechanism.

“Success is dependent on the engagement at all levels of business and too often IT and Records Management try to do it all. That may work for implementation but not for long-term operation.”
