

CLOSE THE GAP

Between scale-up and scale-out infrastructure

Traditional infrastructure can be challenging:

1. Difficult to scale efficiently
2. Costly to expand
3. Limiting for performance & innovation

BOOST AGILITY AND SPEED WITH SCALABLE INFRASTRUCTURE

Scale-out infrastructure supported by Red Hat's open, production-grade technologies helps your business:

SAVE TIME

Using Red Hat® technologies, organizations can develop and deploy apps 66% faster.

9.6 years saved

COX AUTOMOTIVE cut delivery time from more than a month to less than 20 minutes and saved 9.6 years in development time.

70% faster

FICO developed analytic solutions 70% faster with a cloud-based delivery channel for customers, built on Red Hat technologies.

SAVE MONEY

Deploy common hardware within your scale-out infrastructure to decrease server, storage, and networking costs.

50% reduction of TCO

AVIANCA AIRLINES reduced its total cost of ownership (TCO) by 50% by integrating apps across the entire organization.

40% reduction of TCO

KOREAN BROADCASTING STATION (KBS) reduced TCO by more than 40%.

JOIN A COMMUNITY OF INNOVATORS

"The orchestration features of Red Hat CloudForms helped us assemble all the pieces of our infrastructure into a complete solution & simplified management of the technology through automation. We'll also be able to expand the solutions as our needs change."

Frank Venditti
Chief infrastructure architect
MUFG Union Bank

"We now have the capability to alter our infrastructure based purely on code. We can deliver products to market more quickly than our competitors. It's a game changer."

Paul Cutter
CTO
Paddy Power Betfair

"One of the things about Red Hat that we liked was how its solutions are so compatible with products from a majority of independent software vendors (ISVs)."

Daniel Concepcion
Managing director of IT
Produban

TAKE THE FIRST STEP

Toward IT agility and transformation

Ready for scale-out infrastructure?

Deploy a complete DevOps platform with **Red Hat Cloud Suite**, which includes everything you need to assemble your cloud and application development infrastructure.

If your organization is starting with a private cloud first, consider **Red Hat Cloud Infrastructure**, which gives you all of the technology required for an open private cloud environment.
