

# Brilliant User Experience Designed for the Digital Workplace

Simple. Scalable. Cost Effective.

Together, Nutanix Enterprise Cloud, Citrix cloud and NVIDIA offer a simple blueprint to deliver the digital workspace to you. This hybrid cloud solution enables the delivery of graphics-accelerated virtual applications and desktop to every user and every device.

## Product features

Combining Citrix, Nutanix and NVIDIA accelerates the performance of digital workspace, providing users with the best possible experience without infrastructure complexity. The joint solution features:

Nutanix Enterprise Cloud OS

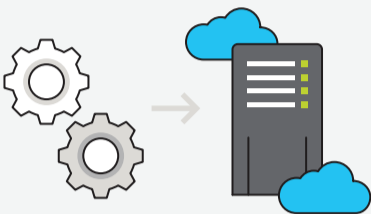

Citrix Cloud XenApp and XenDesktop Service

NVIDIA virtual GPU products (GRID vPC/vApps & Quadro vDWS)

These integrated and complementary technologies provide organizations with simplicity, scalability, performance and cost savings in delivering high-performance virtual applications and desktops that provide the best possible user experience.

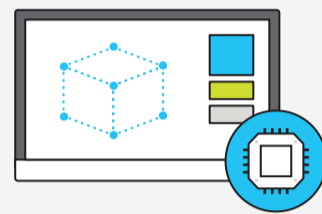

## KEY DIFFERENTIATORS

The Citrix Ready bundle eliminates hypervisor costs by including free choice of AHV or XenServer as the hypervisor.

Only Citrix and NVIDIA enable the H.265 codec in virtual desktops – which can reduce bandwidth consumption up to 50%

NVIDIA provides ultimate user experience for compute & graphics workloads for every vGPU.

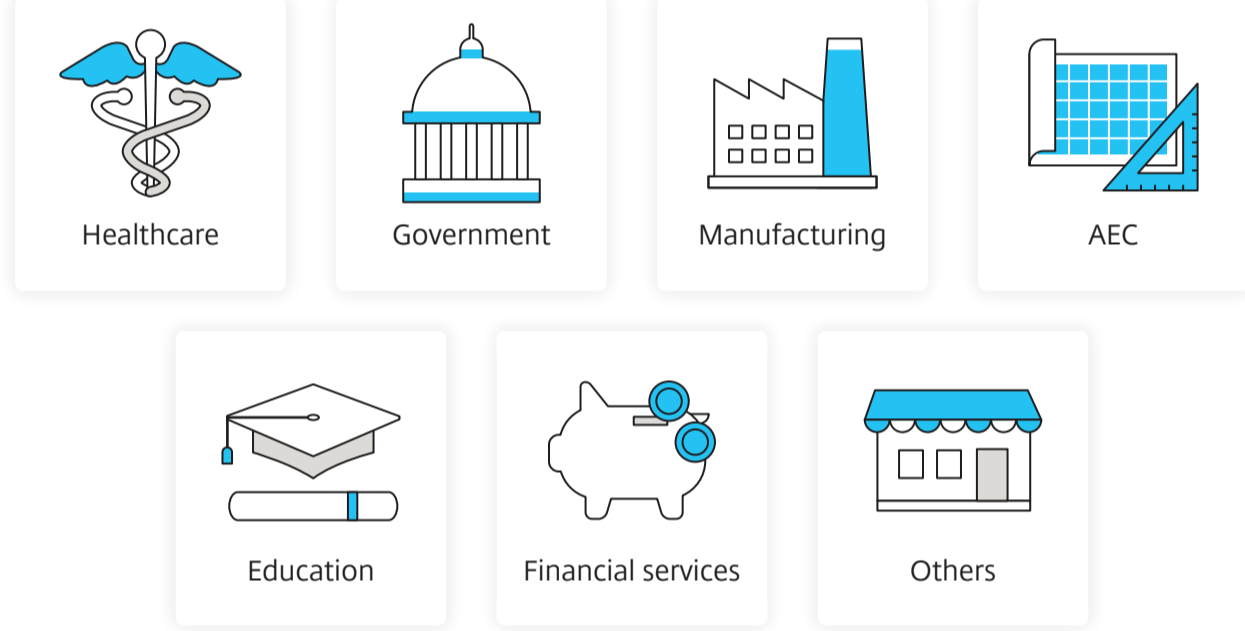

Nutanix automates the deployment of the Citrix Cloud stack and includes NVIDIA vGPU management and monitoring capabilities in its PRISM provisioning system.

Nutanix integrates management of Citrix Cloud XenApp and XenDesktop Service into PRISM, making Nutanix the ideal HCI software for delivering on-premise graphics-accelerated apps and desktops with Citrix and NVIDIA.

## Key Industries

The solution can be used across all industries who are deploying virtual desktops, including

### CITRIX

Up to 90% reduction in the cost and complexity of application upgrades, migrations and updates.

### NUTANIX

Lower total cost of ownership, with IT costs slashed by up to 60% (average investment payback is just seven months).

### NVIDIA

Industry's highest user density solution with support for up to 24 virtual desktops per physical GPU.

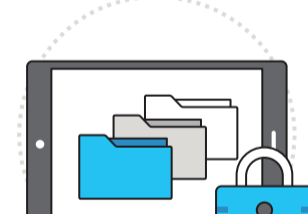

## Top 3 Benefits

Cost-effectively deploy high-quality virtual desktops within minutes, improving employee productivity

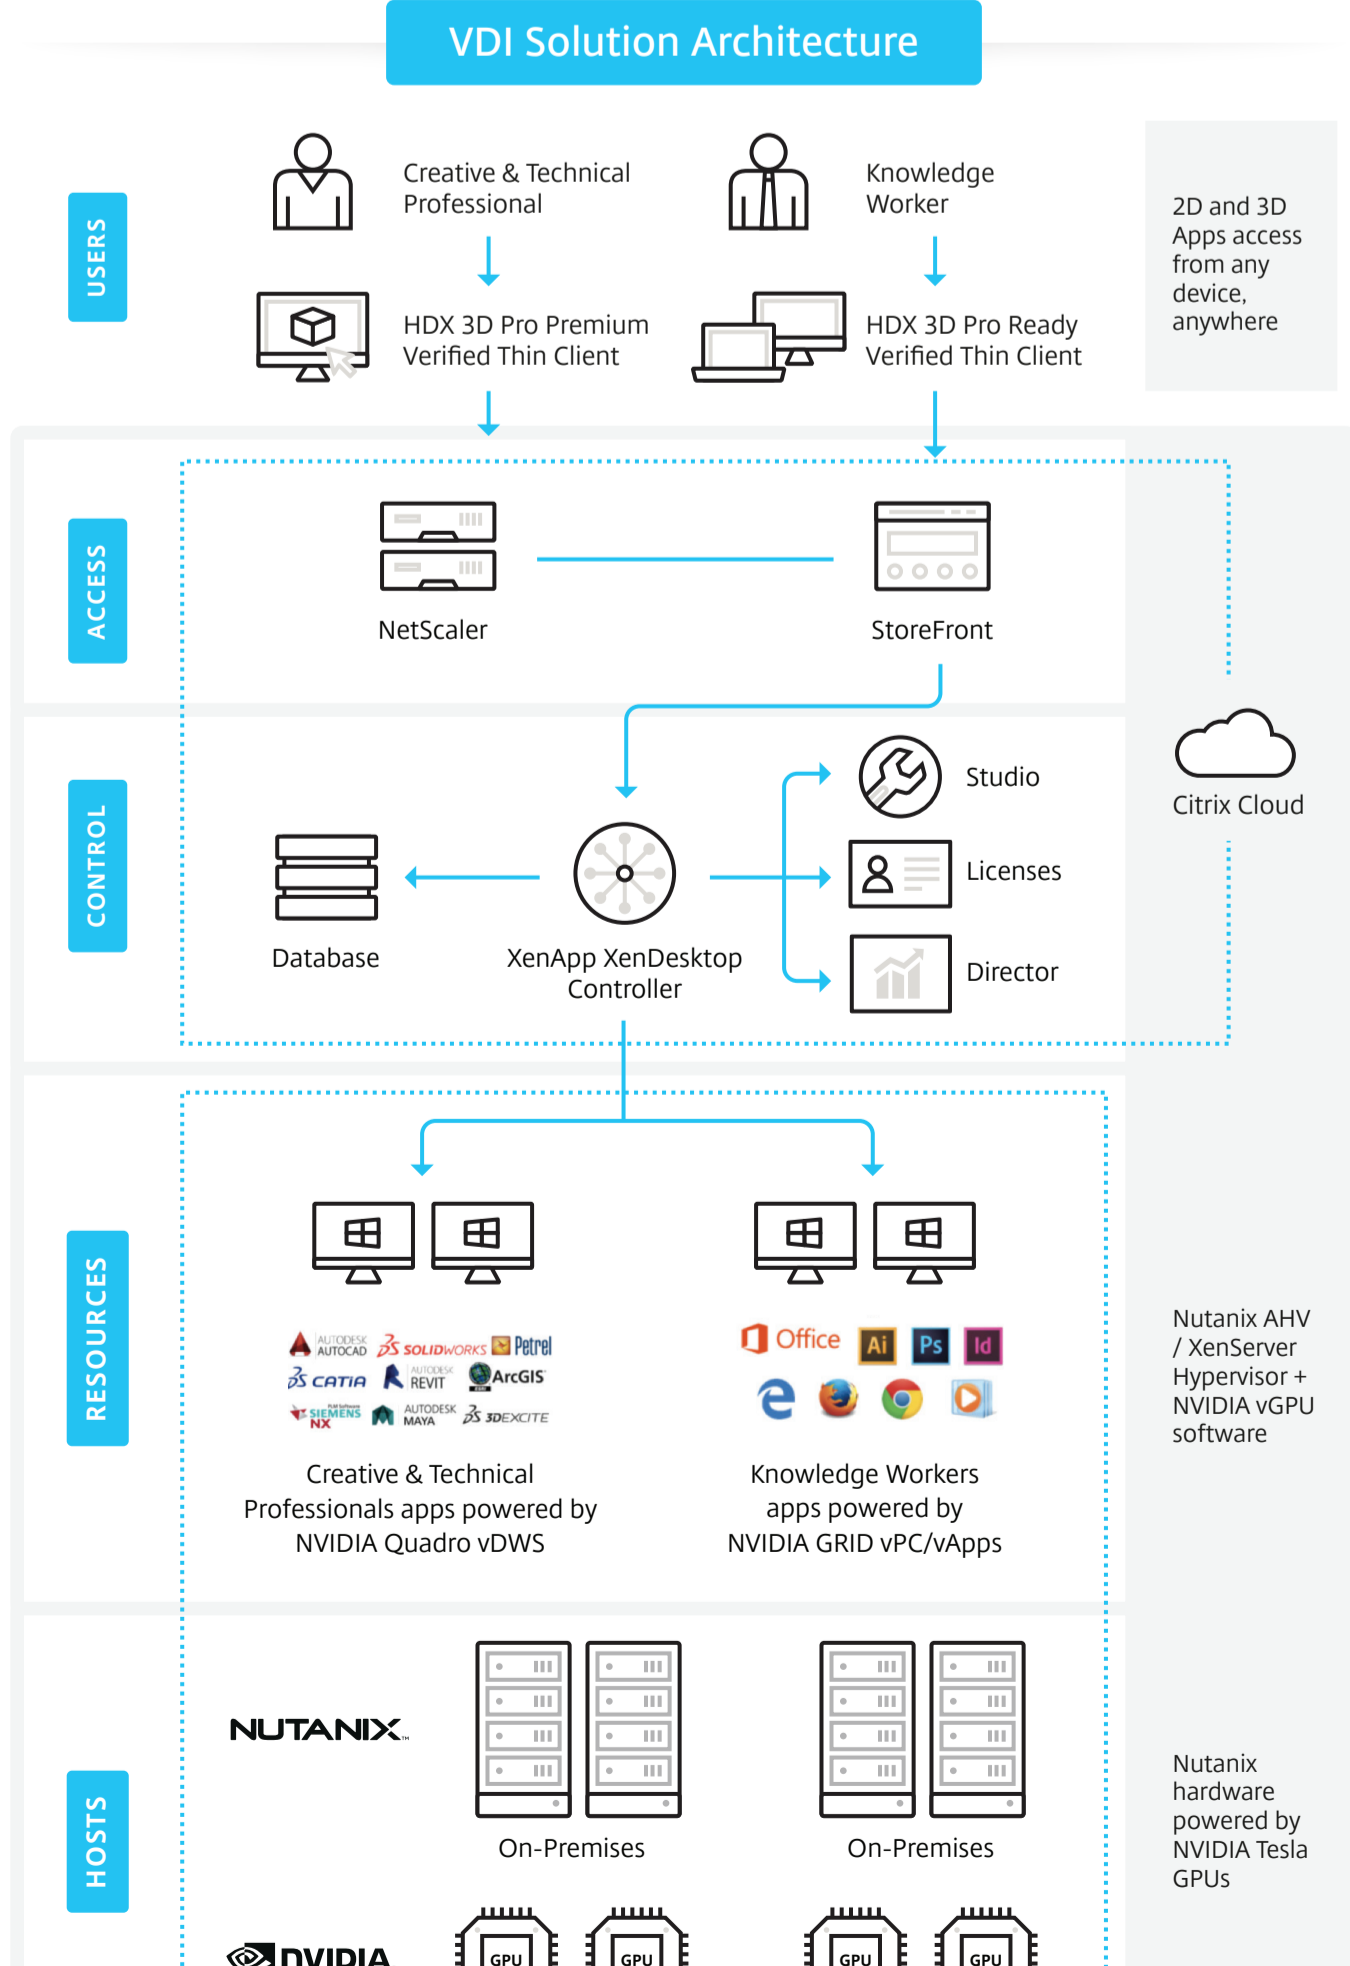

Enable seamless, real-time collaboration among users, from any location and from any device

Centralized data and applications for increased security and ease of management

## VDI Solution Architecture
