

SIMPLIFYING VIRTUALIZATION WHILE INNOVATING WITH RED HAT

TESTIMONIALS

 HEADQUARTERS: HAAR, GERMANY	<p><i>"SAP solutions in the banking industry require a superior level of performance. The combination of Red Hat Virtualization and the Cisco UCS platform allows us to provide financial service providers with a highly available, scalable, and secure SAP environment in the cloud that helps users significantly reduce their operating costs."</i></p> <p>- MARIO BRUGNERA, HEAD OF SAP COMPETENCE CENTER, FI-TS</p>
 HEADQUARTERS: LONDON, ENGLAND	<p><i>"IAG is a longtime Red Hat customer, and we trust them to help us with a hybrid cloud strategy that can meet our needs for years to come. We have been able to reduce our footprint by 15 to 1 while introducing near-infinite scalability so that we can meet the needs of the business as it grows."</i></p> <p>- ADRIAN STEEL, GROUP I.T. MANAGER, IAG</p>
 HEADQUARTERS: BEIJING, CHINA	<p><i>"Based on long-term cooperation with Red Hat, the use of Red Hat Virtualization in Rural Credit Banks Funds Clearing Center makes us feel very secure. The Red Hat solution reduces our cost and increases the utilization and dynamic allocation flexibility. The project is characterized by one-button installation, security reinforcement, and fast backup that ensures the virtualization platform and data are secure. The resource dispatching and policy-driven workload balancing optimize the entire virtual architecture and provide more effective system maintenance."</i></p> <p>- YOA CHUNYANG, ASSISTANT GENERAL MANAGER OF I.T. OPERATION ASSURANCE, RURAL CREDIT BANKS FUNDS CLEARING CENTER</p>
 HEADQUARTERS: LONDON, ENGLAND	<p><i>"Red Hat Virtualization has equipped us with a reliable plan should a catastrophic failure occur in either of our U.S. locations. We are now able to take live snapshots of our virtual machines and synchronise those backup files to each datacenter. When needed, the virtual machine can easily be rebuilt using the most recent backup, and all services will be up and running within hours from the alternate location."</i></p> <p>- SIMON CHIU, SENIOR SYSTEMS ENGINEER, BONHAMS, SAN FRANCISCO</p>
