

# NVIDIA GRID™

## DELIVER ACCELERATED VIRTUAL DESKTOPS TO ANY USER, ANYWHERE

### VIRTUALIZE ANY DESKTOP APPLICATION

Bring the power of virtualization to the users who need it to be their most productive. GRID technology ensures complete virtual application compatibility, meaning any application that can run in a physical desktop can run in a virtual desktop. Organizations can now expand their virtualization footprint without compromise.

### ENHANCE THE USER EXPERIENCE

Deliver accelerated virtual desktops, along with a superior user experience, on even the thinnest notebooks. Because data and applications are housed side by side in the data center, users are able to realize enhanced performance, productivity, and collaboration.

### PROTECT YOUR BUSINESS DATA

GRID technology helps you protect your most valuable data, keeping it secure in the data center while providing just the right level of access to users. Keep your corporate intellectual property safe while also boosting productivity across the enterprise.
