Red Hat CloudForms
Unifies Virtualization, Cloud and Container Management

Red Hat® CloudForms offers unified management for hybrid environments, providing a consistent experience and functionality across virtualization, cloud and container-based platforms. Red Hat Cloud-Forms enables enterprises to accelerate service delivery by providing self-service capabilities, but then extends functionality beyond the portal to include complete operational and lifecycle management of the deployed servic-es. CloudForms delivers greater operational

visibility across the various environments by continually discovering, monitoring and inspecting deeply the managed resources. Using these insights, CloudForms ensures compliance and gover-nance, applying automated policy enforcement and remediation to alert IT staff to problems, or correct them before they are problems. All the while, CloudForms reduces or eliminates the manu-al processes that burden IT staff, driving lower operational costs.
